Setting up of a new Research Project and would like help and support? Please contact the Research Team over at Beech House Lincoln – we are more than happy to help

Research Studies taking place within Lincolnshire

CODEC

This is a Diabetes and Sleep study. It will be available to practices at the end of November. The Research Nurses will be performing the Clinical aspect of the study. Any practices interested in taking part please contact the Research Team.

GCA Consortium Study

This study is still open to practices if you wish to take part. Practices taking part in the study may wish to do a second search for any new patients.

StartRight

Practices already taking part may wish to do a second search for any new patients.

Bee Study

This study is open to recruitment, any practice interested in taking part please contact our team

EuroAspire

This study is now closed and Lincolnshire was the best recruiter in the East Midlands – thank you to those practices that took part.

ATTACK Study - Aspirin To Target Arterial Events In Chronic Kidney Disease

This study is now open to recruitment; please contact our team if your practice is interested in participating
Study aim and objectives: To test the hypothesis that the addition of 75mg aspirin once daily to usual care reduces the risk of major vascular events in patients with chronic kidney disease (CKD) who do not have pre-existing cardiovascular disease (CVD).

A quick word from Eric Wilson, a recruit from the Herewood Medical Practice

I would just like to thank you for being courteous, attentive and very efficient during my recent interview and investigation which was part of the research into the prevention of heart disease.

Although the interview with yourself lasted some two and a half hours it did not seem to drag or become boring at all because you were informative and made it interesting throughout.

I hope that the research results in some useful findings and achieves what it set out to do.

On a personal note I would like to wish you all the best for the future.

Kind Regards

Eric Wilson
